## EDUCATION

### Tsinghua University

*B.A. in English, Minor in Computer Science*

Beijing, China

09/2021-07/2025

- **GPA:** 3.95/4.00 (Accumulative), 4.00/4.00 (Minor in CS)
- **Related Courses:** Calculus, Advanced Topics in Linear Algebra, Probability and Statistics, Discrete Mathematics, Fundamentals of Computer Science, C++ Programming, C++ Programming for Linux, Object-Oriented Programming Training, Data Structures, Principle and Application of Database, Programming Methodology, Theory of Computer Network, Modern Operating Systems, Introduction to Artificial Intelligence, etc.
- **Honors & Awards:** Silver Medal in Class D of the National Olympics of Informatics (2020), Bronze Medal of the Asia-Pacific Regional Informatics Olympiad (2020), Scholarship for Academic Excellence in School of Humanities, Tsinghua University (2022), Group Champion of Men's Fencing Sabre (Group C) in Capital Higher Education Institutions (2023), Scholarship for Innovation in School of Humanities, Tsinghua University (2023)

## PROFESSIONAL EXPERIENCE

### Lasso Private Equity Fund Management Co. | C++ Development Intern

Beijing, China | 07/2024-10/2024

- Developed a high-frequency quantitative trading system; Optimized the trading engine architecture by leveraging databases and improving data structure, significantly reducing the data preprocessing latency by 50%
- Led development to expand the trade system to Bitcoin trading, covering data processing and trade matching
- Implemented an information scraping system for Bitcoin trading and successfully deployed for production, providing consistent and reliable data to optimize trading strategy

### Zhibaiyuan Software Co., Ltd | CV Algorithm Intern

Beijing, China | 01/2024-07/2024

- Built and optimized event recognition AI models for railway safety monitoring; Deployed the model on server
- Developed voice-based intelligent time calibration algorithm to ensure correct timing and safety

### Amap Software Co., Ltd | Software Development Intern

Beijing, China | 10/2023-01/2024

- Developed the online AI task allocation platform to achieve large-scale reconstruction using Java, Python and Docker
- Performed data processing of AI inputs and outputs; Implemented block processing of LiDAR point cloud data

### Datawin Solutions, Inc. | Development Intern

Remote | 08/2023-09/2023

- Developed a web-based status monitoring program using C++ on the Azure cloud platform to achieve automated monitoring and real-time error alarms, significantly improving the availability and stability of platform applications

## RESEARCH EXPERIENCE

### Design of Unsigned NeRF in Computer Vision

Beijing, China

*Research Assistant, Advisor: Prof. Yusheng Liu, School of Software, Tsinghua University*

02/2023-09/2023

- Determined the unsigned NeRF rendering function using deep learning and applied it to multi-view 3D reconstruction
- Extended the Diffusion Model to generate not only closed shapes but also open shapes by exploring the feature vector representation of unsigned distance NeRF

### Study of Diffusion Model in Fractured Object Assembly

Beijing, China

*Research Assistant, Advisor: Taijiang Mu, School of Computer Science, Tsinghua University*

06/2024-07/2024

- Responsible for evaluating the performance of our model against existing methodologies and visualizing the results, introducing diffusion model into the task of fractured object assembly
- Published in *SIGGRAPH ASIA 2024* as 4<sup>th</sup> author - *FragmentDiff: A Diffusion Model for Fractured Object Assembly*

### Impact of the General Data Protection Regulation (GDPR) on Public Evaluation of Apps

Remote

*Research Assistant, Advisor: Prof. Xiaojing Dong, Santa Clara University*

07/2023-09/2023

- Performed data collection, cleaning, and organization of user review data for the given Google Store apps
- Constructed a mathematical model based on the event study method to predict the number of negative reviews
- Validated the correlation between using GDPR and user reviews of applications

### Dataset Construction for Monthly City-Level Economic Data

Beijing, China

*Research Assistant, Advisor: Prof. Xiao Tang, School of Public Management, Tsinghua University*

10/2022-07/2023

- Designed and developed a web crawler to collect and organize economic data disclosed on government websites
- Leveraged large language model technology to achieve intelligent data extraction, significantly improving data accuracy and processing efficiency
- Organized data in a systematic way and established an efficient, structured economic database

### Investor Email Collection and Content Analysis

Beijing, China

*Research Assistant, Advisor: Prof. Xu Da, School of Economic, Tsinghua University*

09/2022-02/2023

- Coded in Python to extract the websites of NASDAQ-listed companies and signed up for email subscriptions
- Reviewed and organized economic research methodology literature to provide references for subsequent studies

## SKILLS

**Languages:** Mandarin Chinese (Native), English (Fluent, TOEFL - 114, GRE 336), Japanese (Elementary Level)

**Programming Languages & Tools:** C++, Python, Qt, SQL, Java, Docker, etc.
